EDUCATION

Royal Holloway, University of London *2024 - Present*
BSc Computer Science (Final Year)

EXPERIENCE

Business Analyst Summer Intern — AI & Smart Technology *June 2026 - September 2026*
Tata Consultancy Services (TCS), London, UK

- Contributed to the AI & Smart Technology team within the BFSI Data Lab, supporting the design and development of internal tooling for knowledge management across the consultancy.
- Led architecture decisions and technical planning within the team, translating product ideas into buildable concepts.
- Delivered a self-serve deployment package with full documentation for an internally developed tool.
- Collaborated with senior leadership across the UK and India on a client-facing paper covering Mistral AI's engineering roundtable in Mumbai.

Data Lab Spring Intern — BFSI *May 2025 - July 2025*
Tata Consultancy Services (TCS), London, UK

- Gained early insight into global financial systems, including digital business services and international trade operations within a large-scale banking environment
- Conducted research on sustainability in financial systems, presenting findings on ESG-driven transformation and developing skills in analysis and professional communication

Work Experience Intern — FinTech *July 2022*
HSBC, London, UK

- Gained early insight into global financial systems, including digital business services and international trade operations within a large-scale banking environment.
- Conducted and presented research on sustainability in financial systems, focusing on ESG-driven transformation and developing skills in analysis and professional communication.

PROJECTS

HTML as a Format — Internal Knowledge Tool View GitHub Repository
React · Node.js (Vite & Express) · Anthropic API

- Built a full-stack internal tool converting knowledge artefacts (PowerPoints, PDFs, meeting transcripts) into interactive HTML pages, using React 19, Vite, Express, and the Anthropic API.
- Designed a skills-based rendering pipeline with three output formats (Timeline, Gallery, Bubble Map), structured extraction to per-slide JSON, and VLM-powered image captioning.
- Architected a plugin/extension system for custom renderer formats and delivered a self-serve deployment package with full documentation under an MIT licence.

Oaxaca — Restaurant Management Platform View GitHub Repository
React · FastAPI · SQLite

- Built a full-stack operational management system with real-time order tracking and role-based dashboards (kitchen, manager, waiter), supporting structured workflow visibility across users.
- Led backend architecture and Agile delivery across a 5-sprint cycle, coordinating backlog management, sprint planning, and feature prioritisation within a cross-functional team environment.
- Implemented cost-of-goods (COGS) analysis to support operational financial visibility and decision-making, and resolved a critical system failure by rebuilding the database schema under delivery pressure.

TECHNICAL SKILLS

- **Languages:** Python (NumPy, Scikit-learn, Matplotlib), Java, JavaScript, SQL (PostgreSQL, SQLite)
- **Frameworks & Tools:** React, Node.js, FastAPI, Anthropic API, Git, Figma, Lovable, MS Office
